Snow Days

When the children returned to school for the new Term, there was lots of fun to be had in the snow!

Thank you

We would like to say a huge thank you to Pimbo Garden Centre for their recent donation of rock salt during the snowy weather. We would also like to thank Mr Andy Wroe for giving up his own time and coming out in the early mornings in order to put the rock salt out to help keep our school grounds safe for the children that we have in school.

Viking Invaders

This week, Class 3 have been learning all about Viking armour and weaponry.

Learning at Home

We have seen some fantastic work these last two weeks from the children who are learning at home. From demonstrating adept computer and technology skills to drawings, making models and using household equipment, you have all been amazing!

History - Prehistoric Britain - By Eleanor K

Prehistoric Timeline

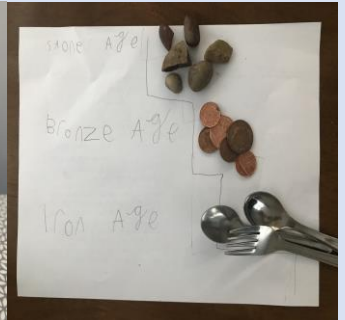

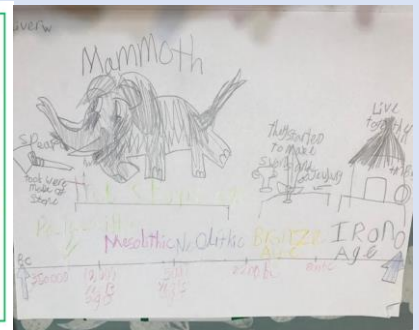

Early Stone Age (Palaeolithic) 2.5 million years ago to 10,000 years ago in the Early Stone Age. Britain was part of mainland Europe. Early Stone Age people lived in caves or very simple shelters. They made stone tools and survived by hunting and foraging.	Middle Stone Age (Mesolithic) During the Middle Stone Age, Britain was linked to Europe by a strip of land called Doggerland. People in Britain began to set up camps along the British coast and on their banks. Hunters often worked together as a team, using spears and bows and arrows. People used wolves to guard their camps!	Late Stone Age (Neolithic) Britain became an island at the start of the Late Stone Age. At this time, people learned to farm. They raised large areas of land and settled down. To live in small communities. Neolithic people used flint, and some to make tools, and developed the skill of making clay pots.
--	---	---

Stone Age **Bronze Age** 2,500 BC **Iron Age** 800 BC

Source: We have looked at this website for information: <https://www.bbc.co.uk/3/subjects/topics/3/2/history/articles/3/np/3/4/>
Later we are going to watch the films *Main* and *Ice Age*.

Remains: Invaded Britain in 800 BC. The Iron Age ended in Britain in AD 43 when the Romans arrived. People started living in cities and began to make a Roman way of life.

What I would like to know...
Did they have cheese? If not they are CCCCCRRRRRAAAZZZZYYYY!!! So, what did they eat?

Children's Corner

Lockdown Rap (to the tune of 'Yellow Submarine') by Joe L, Class 3

In the town where I was born
Lives my nan, who I can't see
I'll tell you more about my life
In the land of quarantine
So we stayed out of the sun
Even while the trees were green
To avoid the next wave
Of COVID-19

We all live in COVID quarantine, COVID quarantine, COVID quarantine
We all live in COVID quarantine, COVID quarantine, COVID quarantine

And our friends, well they're all bored
Even Maureen who lives next door
Because we can't go out to play

We all live in COVID quarantine, COVID quarantine, COVID quarantine
We all live in COVID quarantine, COVID quarantine, COVID quarantine

And we live a life of unease
In case one of us, starts to wheeze
We just wait, for our vaccine
In the land of quarantine

We all live in COVID quarantine, COVID quarantine, COVID quarantine
We all live in COVID quarantine, COVID quarantine, COVID quarantine
We all live in COVID quarantine, COVID quarantine, COVID quarantine
We all live in COVID quarantine, COVID quarantine, COVID quarantine

Dates for the Diary

05.02.2021 Number Day
08.02.2021 E-Safety Week
09.02.2021 Safer Internet Day
12.02.2021 Chinese New Year
13.02.2021 Close for Half-Term
(3.30pm)

Science Challenge Corner

Paper Windmill

You will need:

- Paper
- Pencil
- Drawing pin (or nail)

1. Cut your piece of paper into a square. You can do this by folding the short edge so it meets the long edge then trimming the excess.
2. Decorate both sides of the paper.
3. Fold the paper diagonally so it turns into a triangle and crease it lightly. Repeat this for the opposite direction as well. You will then unfold and have a creased "X" on the page.
4. Cut along the creases about halfway to the middle of the paper. Don't cut all the way.
5. Bend each corner into the middle (bending and not folding)
6. Once all 4 corners are in the middle, push the drawing pin (or nail) through the middle and into the pencil.

THE SCIENCE

Wind is moving air. Wind happens both because of how the Sun heats up the Earth and the tiny air molecules that move around us all the time. As the Sun heats up the Earth's surface, differences in air pressure cause air to move
